Custom Light Bulbs that Utilize State-of-the-art Technology

Headquartered in Orange, Connecticut, LightSources has locations on three continents and is an international front-runner in cutting-edge design and the manufacturing of various specialty lighting technologies. We manufacture custom light bulbs for some of the largest corporations in the world as well as collaborate with entrepreneurs and small or medium size OEMs to service their specific needs. Our team of highly skilled professionals has the expertise to take virtually any prototype right through to finished production.

Our vast experience allows us to design; engineer, test and deliver custom light bulbs that meet the most stringent requirements of virtually all industrial applications. In addition we continue to build strong, strategic partnerships with many of our customers in order to cost-effectively mass-produce and provide short turn-around times for specialty lighting. By utilizing the expert services of LightSources, clients have the opportunity to develop proprietary products and private brands that help to set them apart in the marketplace.

LightSources is proud of our ability to offer short runs and just-in-time completion to give companies a flexible supply. The fact that we operate our own modern fluorescent glass factory in Hungary as well as our other state-of-the-art facilities in the U.S. and Europe means we are able to respond quickly to our partners' requirements.

LightSources and our affiliated companies represent the leading high-tech designers and manufacturers in the lamp industry today. Our products are used world-wide in a multitude of applications and industries such as our avionic display backlighting that is part of the National Defense and US Space Program. The LightSources team consists of the most highly skilled professionals that specialize in a range of innovative solutions. Contact us to learn more about our custom light bulbs.
