

UV Equipment Suppliers

LightSources and our strategic partner, LightTech, are the world leading *UV equipment suppliers* offering OEMs cost-effective solutions for a large range of industrial applications.

Along with our high-quality, standard UVC germicidal lamps, we also offer fully customized lamps designed to meet almost any requirements. Our system-level designs take into account the following: ambient operating conditions, UVC watts, operating life, and other essential performance criteria. Also our specialized UV lamps are available with proprietary components that offer environmentally friendly technologies, optimal performance, high efficiency and long lasting solutions.

UV Equipment Suppliers: OEM-focused Solutions

As leading UV equipment suppliers, almost everything about our lamp can be customized, including length and diameter, power, fitting sockets, and ceramic bases. The LightSources group's proprietary ceramic bases are resistant to UVC radiation, ozone, heat and moisture and have a high-quality appearance. Other base materials are available upon request.

Our experienced engineers work with OEMs to custom design lamps from prototype right through to a finished product for virtually any application. Furthermore by taking advantage of our innovative lighting solutions, our clients can distinguish themselves in the marketplace with their own proprietary products and private brands.

LightSources and LightTech's customers benefit from our over three decades of experience as well as our state-of-the-art manufacturing facilities that offer clients the most flexible supply, quick manufacturing turnaround, and reduced transportation costs. In addition we are committed to giving clients the highest quality of care by building strong, strategic partnerships. It is these relationships that allow us to initiate mass-production of new types of proprietary and specialty lamps both cost-effectively and with short turnaround.

LightSources and European partner, LightTech, along and our affiliated companies represent the leading high-tech designers and manufacturers in the lamp industry today. Our products are used world-wide in a multitude of applications and industries such as our UV germicidal lamps that offer patent-protected, OEM-oriented solutions. Please contact us to learn more about our innovative customized solutions from the top UV equipment suppliers.
