Leading UV Lamp Suppliers – Flexibility and Fast Turnaround

As global UV lamp suppliers, we bring our comprehensive services and extensive resources to each of our clients. By utilizing our services, OEMs can set themselves apart from their competitors by offering their own proprietary products and private brands, thus ensuring them of a large/profitable aftermarket re-lamp annuity.

With unmatched flexibility, we can handle small runs of just a few lamps to huge runs for mass-market applications. And when we say fast turnaround time, we mean it. We have the modern, up-to-date facilities to cost-efficiently provide OEMs of any size the UV germicidal lamps they need.

In addition OEMs benefit from our extensive in-house engineering resources that provide the expertise to assist in developing the right custom specialty lamp for their applications. A lamp can be completely customized including the length and diameter, power, fitting sockets, and ceramic bases. Our team works with clients from the initial stages of a prototype right through to finished product.

We take pride in offering clients the highest quality services and work to build strong, strategic partnerships along the way. Contact us to learn how we can help with your specialty lighting needs.

LightSources and our affiliated companies represent the leading high-tech designers and manufacturers in the lamp industry.
