## Lampholders and Wiring Devices

With the Kulka brand our organization provides over 150 years of combined experience in the manufacture of electrical wiring devices, quality fluorescent, high intensity discharge and incandescent lampholders; starter sockets and convenience outlets.

Our engineers at [Voltarc will assist you](#) in the design and application of current or brand-new product designs.

It's simple: Kulka offers you a total systems approach while lowering your total costs. A good example is Voltarc's innovative [TriLight Max series](#). TriLight Max is made with recessed double contact end caps for easy retrofit with Kulka RDC lampholders for safety and reliability. It allows [retrofitting](#) to industry standards spacing. Our new design concepts of keyed lamp bases and mating sockets for fluorescent lamps have proven to be beneficial to many of our clients.

For us, it's a matter of course to be committed to continuous quality assurance and improvement programs to constantly provide you with the best product solutions.

Kulka – nothing looks like it... nothing works like it!

Our Kulka product portfolio includes:

- Medium [Bi-pin](#), Miniature Bi-Pin Lampholders
- [Slim Line](#) Lampholders
- [RDC](#) (Recessed Double Contacts) Lampholders
- [Miscellaneous](#) & Accessories
