

Applications

With our long-time expertise in the signage industry, Voltarc's sign technology has continuously improved to meet the highest quality requirements of our clients. Therefore, our sign products can be used with a wide variety of hot, standard or cold applications – including uses for branding, exhibiting, retailing and merchandising, architecture, transportation and infrastructure, industrial applications, warehousing and many others.

Our technology is so versatile because it is designed to be reliable, high-performing, long-lasting and easy to use. If these qualities represent value in lighting technology for you, then it's time to [talk to Voltarc](#).

Specific applications include:

- Indoor signage
- Outdoor signage
- Advertising displays
- Exhibits
- Point of purchase displays
- Retail lighting
- Architectural lighting
- Building fascia
- Refrigerated showcases
- Tunnel lighting
- Warehouse and hard to lamp places
- Basically, any commercial overhead lighting that you want to key into the long life of the industrial lighting complexes... any place where you need industrial lighting
