

Fluorescent Lamp Manufacturers

Our continued commitment to research and development is what has allowed us to stay competitive as one of the world's foremost *fluorescent lamp manufacturers*. LightSources and our affiliate LCD Lighting bring to the industry a wealth of patented and propriety innovative technologies that set us apart from our competitors. As an OEM-focused specialty lamp company, we offer both standard and custom-designed fluorescent lights to meet the needs of a multitude of applications and industries. By operating our own state-of-the-art fluorescent glass factory in Hungary as well as our own manufacturing facilities and distribution centers in the U.S. and Europe, we offer flexible supply with a quick turnaround.

Fluorescent Lamp Manufacturers – Unsurpassed Expertise and Service

Among the many patented innovations that have helped us to remain as one of the premier fluorescent lamp manufacturers in the industry is Ultra-Bright™. It is a unique combination of manufacturing processes and advanced materials that push the performance and quality levels of our lamps beyond anything else on the market. The Ultra-Bright technology can be applied to any hot- or cold- cathode, bent fluorescent lamp from 8mm to 25mm diameters. With this process, we eliminate any performance loss at the bends and deliver more total lumen output for a given wattage input.

Another reason to choose LCD Lighting as your go-to fluorescent lamp manufacturer is our ability to create proprietary blends using rare earth tri-phosphors to provide true and natural color while retaining a high CRI (Color Rendering Index). The CRI quantitatively measures a light source's ability to render color on a scale of 0 to 100 percent, and the higher the CRI, the better. By taking advantage of our unique technology, OEMs and end-users receive custom colors and images that will optimally serve their unique products and application requirements.

We offer our clients one-of-a-kind trusted solutions and dependable services. Allow us to help design and supply specialty fluorescent lighting for your application.

LightSources and our affiliated companies, LCD Lighting, Voltarc along with strategic partners LightTech, and Cerlux represent the leading high-tech designers and manufacturers in the lamp industry today. Our specialty products are used world-wide in a multitude of applications and industries. Please contact us to learn more about all of our products and services from one of the foremost fluorescent lamp manufacturers.
