

# Medium Pressure Ultraviolet Lamps (MPUV)

## Warranty Policy

LCD Lighting warranties all of our MPUV lamps against defects in materials and workmanship for a period of 1 year after manufacture.

The quality of our MPUV lamps is second to none; they will provide at least 1,000 hours of useful life under normal conditions, unless otherwise stated. In the unlikely event of failure after less than 100 hours, a 100% credit will be given.

If failure occurs between 100 hours and the guarantee period, we will issue a pro-rated credit relative to the difference between the actual period and the guaranteed period at the time of failure. For example, a lamp with a normal guarantee period of 1,000 hours, which fails after 600 hours, would result in 40% credit.

Misuse or misapplication of the lamps will void the manufacturer's warranty.

This warranty is restricted only to replacement of the lamp. LCD Lighting will not be responsible for any other damages, consequential or otherwise.
