

## Aristo D750 Dimmer

The Aristo 750-Dimmer solid state dimmer has a smooth rotary action that provides infinite control over a full range of intensity levels. The 750-Dimmer is designed for use with most Aristo Cold Lights and is capable of handling up to 750 Watt inductive load. It is housed in an attractive sturdy metal case, complete with on/off toggle switch and six foot long power cord. This unit features a second adjustment for setting minimum brightness levels.

The 750-Dimmer can also be used for adjusting dry down or any application where voltage control is desired.
